

HOMERWOOD®
— THE PREMIUM HARDWOOD —

FOR LIFE.

Appalachian Hardwood, lovingly handcrafted into the finest American-made hardwood floors — The Essence of HomerWood®. Recalling the age of quality and craftsmanship, we hand select each plank from sustainable, center-cut lumber to reveal the character and unsurpassed beauty created by nature. From these planks we handcraft and custom design exceptional hardwood floors for those who seek style, elegance and individuality. That's why, quite simply, there is no finer choice for your home than a HomerWood Premium hardwood floor.

Our classic to contemporary designs offer truly spectacular floors in a range of beautiful species, colors, styles, textures and surface treatments to suit any personality or lifestyle. Made in America, from American hands and hearts to your home, each plank is a reflection of who we are and the quality of work we do.

That's why you can trust your home to HomerWood.

Premium

TRADITIONAL CHARACTER™

Our Traditional Character floors, handcrafted from desirable center-cut lumber, reveal all of the trees' natural beauty, and preserve the distinctive graining and inherent characteristics created by nature. Featuring both clear and character planks, the result is a stylish, elegant floor.

Your home is an expression of your individual style, a reflection of your unique personality, and when it comes to décor, you simply want the very best. Why settle for anything less, consider HomerWood the perfect choice.

AMISH HAND-SCRAPED®

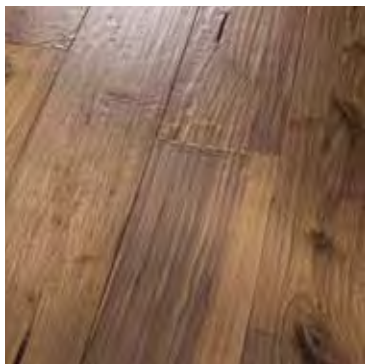

HomerWood's Amish Hand-Scraped floors offer an exceptionally striking, one-of-a-kind look. A true work of art, each premium plank is uniquely hand-scraped by experienced Amish craftsmen, whose creativity combined with nature assures that no two planks are the same — a highly desirable feature of our hand-scraped floors.

And, as with any artist, each plank proudly bears the signature of the craftsman who created it. Our traditional Amish scrape covers the full surface of the floor and creates a richly textured appearance that is warm and appealing, enhancing every style of décor from classic to contemporary.

SMOKED SPECIALTIES™

Our Smoked Specialties floors offer dramatic, rich and alluring visual elements that add design and depth to a room. The natural figuring of the grain is accented by gently flaming the wood,

board by board. The heat from the open flame caramelizes the sugars in the sapwood, creating a shadowed look that can't be imitated. A true work of art, created exclusively by HomerWood.

WIRE BRUSHED

Texture has long been an important interior design element, as it seduces the eye and adds dimension to a living space. Wire brushing is a subtle texturing technique that enhances the

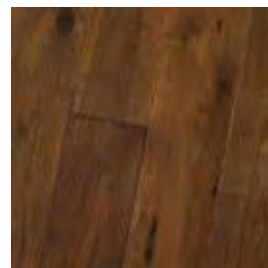

soft grain, creating a seasoned appearance. The look can be further enhanced with a liming technique that infuses the soft grain and adds a contrasting color.

Custom

Personalizing and designing a space that is truly reflective of one's own tastes and lifestyle are key to making a house your home. If you are unable to find just the right floor within our product portfolio, let HomerWood's unrivaled custom capability turn

your vision into a reality. Use beautiful species, colors, styles, textures and surface treatments as your palette to create handcrafted works of art to suit the style and aesthetic of any space.

CREATE YOUR OWN HARDWOOD ARTISTRY WITH A VARIETY OF OPTIONS

CONSTRUCTION

Select Construction - All custom floors are available in both solid and engineered construction.

TEXTURE

Select Textures - Visual elements like texture and artistic treatments add depth and intrigue to any space.

COLOR & GLOSS

Select Colors - Your color options are virtually endless. Or select from a versatile palette of curated color choices that answer both classic and contemporary style demands. Optional gloss levels available.

SPECIES

Select Species - Feature any combination of texture and color using American wood species with distinct character. A cleaner visual can be achieved with a Prime style floor. 100% filled knots available.

WIDTH

Select Widths - Your choice of widths and lengths in solid and engineered construction.

SOLID | available in widths from 3" - 8" and lengths up to 10'.
ENGINEERED | available in widths from 3" - 12" and lengths up to 12'.

Custom

ENGRAVING

Enhance your home with the distinction of an engraved plank tailored to your unique personality. Greet guests with entryway planks bearing a family name or meaningful phrase.

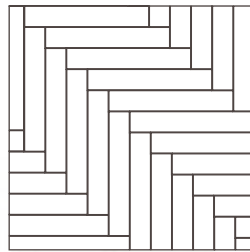

Whichever you choose, HomerWood is delighted to assist in authenticating your one-of-a-kind premium hardwood floor.

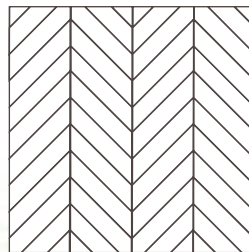

DESIGN PATTERNS

Bring an element of the unexpected to any room with elegant flooring patterns reminiscent of historic European chateaus. Add dramatic depth to expansive rooms or accentuate entrance

ways with intricate designs. Choose from any of HomerWood's unique surface treatments and an array of luxurious colors to further set your floor apart.

Herringbone

Chevron

Trim & Moldings

Our trims are expertly matched to coordinate with each hardwood floor for a united look from wall to wall. Our trim and moldings feature colors that stay vibrant and resist wear with a UV-Cured Urethane finish that is more durable

than site finished trim. These flooring accessories can be ordered for any of our standard product lines, including Birch Run™, Aesthetics™ and custom flooring orders.

Length: 78"
Thickness: 9/16", 5/8", 3/4"

Reducer Strip

A Reducer Strip is used to equalize the level between two different heights in flooring surfaces. Occasionally called a transition, a reducer can be used around fireplaces, doorways, as a room divider, or to transition between wood flooring and adjacent floor coverings that are lower than the surface of the floor.

Length: 78"
Thickness: 9/16", 5/8", 3/4"

Stair Nose

A Stair Nose is used to provide a finished trim when transitioning from flooring to the edge of a stair. It can also be used for trim on stair landings and elevated floor perimeters.

Length: 78"
Thickness: 3/4", 7/8"

Threshold

A Threshold is used to cover expansion space and provide a smooth transition in surfaces with height differences. A Threshold can be used against sliding track doors, fireplaces, carpet, ceramic tile, or even existing thresholds.

Length: 78"
Thickness: 5/8"

T-Molding

A T-Molding is used to cover the expansion space between two equal height flooring surfaces. It can be used at doorways and as a transition to another surface of approximately the same height to allow for more expansion space.

Length: 78"
Thickness: 3/4"

Quarter Round

A Quarter Round is used to cover the expansion space between the floor and an adjacent wall. It can be installed next to baseboards, case goods and stair steps.

All trims are made of solid wood and produced in the USA. The trim will be of the same species and have the same texture as the flooring it is being coordinated with. For overall trim dimensions please visit our web page and download our helpful installation guide.

ABOUT OUR FLOORING

Our Character Styles

HomerWood pioneered the word “Character” to describe our use of the entire log to show all the wood’s inherent characteristics and natural beauty in our floors. The very fingerprints of nature have been beautifully and reassuringly preserved. These unique naturally occurring characteristics may include an array of open and filled knots, original markings, splits, checking, sap, pith, mineral streaks, color variations, embodied cracks, and variations in grain. The wood’s appearance determines its style or grade, and markings may vary with each width. The end result is an elegant floor that reveals all of the trees’ natural characteristics.

Our Custom Prime Styles

Our Prime floors feature natural inherent characteristics, however, we’ve taken special care to limit the size, amount and frequency. Prime floors highlight select, unique characteristics that are visually modest and give these floors a cleaner appearance overall.

Our Finishes

Our UV-Cured Urethane with Aluminum Oxide features a proprietary cross-polymer additive that provides superior wear properties. The sealers and topcoat we use are low solvent and low volatile with minimal emissions and do not auto-oxidize. Our finish provides long-lasting beauty with superior clarity that allows the natural beauty of the grain to show through. You can see and feel the difference!

Our UV Oil is a two-coat, factory-applied oil that is cured with UV lights and ready to install. This penetrating Oil finish provides natural beauty with no oily residue that is easy to refresh and repair.

Our Warranty

HomerWood offers a Lifetime Structural Warranty on all of our floors. Our UV-Cured Urethane floors carry a 50-year residential finish warranty and a 3-year commercial finish warranty. As our UV-Cured Oil finish is absorbed into the wood, our finish warranties do not apply.

For warranty details, visit homerwood.com.

Our Commitment To The Environment

HomerWood purchases raw material from suppliers who employ only the highest standards in forestry practices, thus assuring the conservation and replenishment of our forests. HomerWood floors are FloorScore® Certified and CARB Phase 2 compliant for formaldehyde, with no added urea-formaldehyde. HomerWood is a zero-waste manufacturer, and all wood fiber from the manufacturing process is utilized, right down to the tiniest particle of sawdust.

Ranked by Janka Hardness Rating

HomerWood Disclaimer: Due to printing limitations and natural color variations in raw wood, colors pictured cannot be guaranteed to match actual stained flooring material. In addition, it is impossible to portray the complete array of natural characteristics and color variation that may occur in hardwood and which will make your HomerWood floor truly one-of-a-kind. Room scenes, pictures and hardwood floor samples are intended as a visual guide reference and not as the actual representation of the hardwood floor itself. Since every tree provides us with its own unique natural characteristics, your newly installed floor may vary from samples or pictures shown. Natural color variation in raw material will dictate the final shade of stain. Wood will react to changes in moisture and humidity. In order for your floor to perform properly, indoor humidity should be maintained between 35%-55% year round. We recommend following NWFA guidelines and the use of an NWFA-certified installer.

HOMERWOOD®

— THE PREMIUM HARDWOOD —

Cover Image: Our cover features a North American Hard Maple tree typically found in the Appalachian region. Trees that grow in this region are "Slow Growth," which means they are dormant in the winter months, and will only grow up to 12 inches in the spring, summer and fall growing season and therefore take years to come into maturity. HomerWood carefully selects its lumber from only slow-growth trees, as these produce a more stable cut of wood, with beautiful heartwood and a very tight graining pattern.
