

Light Reflectivity

Rejuvenations™ with Diamond 10® Technology

All light reflectivity values listed are based on a percentage system, the higher the percentage (e.g. 20-24, 35-39), the higher the light reflectance of the floor. It is measured per ASTM E1349, *Standard Test Method for Reflectance Factor and Color by Spectrophotometry Using Bidirectional (45°:0° or 0°:45°) Geometry*. Research indicates reflectance can help drive daylight further into space and reduce reliance on artificial lighting, resulting in reduced electricity usage and costs. Glare from flooring is a characteristic of glossy finishes, not reflectance. Flooring in lighter colors with a matte finish have high reflectance values, but do not add to glare. Flooring with light reflectivity values great than 25% can contribute to the LEED® Interior Lighting Credit.

Value	Sku Numbers
0-9	
10-14	37527, 37529, 37530, 34512
15-19	37533, 37537
20-24	38509, 38511
25-29	37501, 37532, 38504, 38505
30-34	37502, 34511, 38506, 38512
35-39	37524
40-44	37523, 37525, 38501, 38502, 38508
