

Light Reflectivity

Corlon®

All light reflectivity values listed are based on a percentage system, the higher the percentage (e.g. 20-24, 35-39), the higher the light reflectance of the floor. It is measured per ASTM E1349, *Standard Test Method for Reflectance Factor and Color by Spectrophotometry Using Bidirectional (45°:0° or 0°:45°) Geometry*. Research indicates reflectance can help drive daylight further into space and reduce reliance on artificial lighting, resulting in reduced electricity usage and costs. Glare from flooring is a characteristic of glossy finishes, not reflectance. Flooring in lighter colors with a matte finish have high reflectance values, but do not add to glare. Flooring with light reflectivity values great than 25% can contribute to the LEED® Interior Lighting Credit.

Value	Sku Numbers
0-9	88700
10-14	88728
15-19	88701, 88735
20-24	88736
25-29	88734, 88737, 88738
30-34	88713, 88717, 88727
35-39	
40-44	88729, 88730, 88732
45-49	88702, 88704, 88726
50-54	88712, 88731
55-59	88703, 88705, 88724
