

## Staining Reagents

### 2.5 mm LVT with Diamond 10® Technology

Mixtera™

We extensively test all our products to determine how our different flooring products will perform in use — and, how the flooring will react to staining reagents. Owners and specifiers know the types of substances that may potentially stain surfaces in their building. This chart is designed to provide owners and specifiers with accurate information about a wide variety of cleaners, disinfectants, foods, beverages, oils, organic solvent and other substances that may be found in buildings and affect the performance of the floor.
