

# PRODUCT INFORMATION

## 2001 PREMIUM SEALER

### Description

2001 PREMIUM SEALER is a water based poly-acrylic sealer.

2001 PREMIUM SEALER is a pre-seal coat for SHINEKEEPER LONG LASTING POLISH and is a pre-requisite for a good floor treatment schedule for vinyl sheet and tiles and where high traffic is anticipated.

2001 PREMIUM SEALER is easily applied and the dried film possesses exceptional film toughness, clarity, lack of yellowing and produces an excellent base for application of SHINEKEEPER LONG LASTING POLISH.

2001 PREMIUM SEALER is also an excellent first coat for porous or worn floors as it lifts colour, fills porous areas and gives an excellent base for ease of maintenance.

### Physical Properties

Colour	White
Non-Volatile Matter	20%
pH	8.5 – 9.0
Specific Gravity	1.035
Drying Time	30 minutes – dependant upon conditions
Coverage	20 – 40m <sup>2</sup> /litre

### Available Container Sizes

4 litres, 25 litres

### Directions for Use

Prepare floor for sealing by thoroughly stripping with NEW BEGINNING EXTRA STRENGTH CLEANER AND STRIPPER (see label or Technical Data Sheet for details), rinse well and allow the floor to dry.

When the floor is clean and dry apply one coat of 2001 PREMIUM SEALER using a lambs-wool applicator or clean poly-cotton mop. Spread the sealer evenly over the floor, ensuring pools do not develop.

Allow 2001 PREMIUM SEALER to dry and cure for one hour before applying a minimum two coats of SHINEKEEPER LONG LASTING FLOOR POLISH.
