

CASITA

Luxury Vinyl Planks
For Residential Applications

INSTALLATION

• Job Condition

Subfloor / underlayment shall be levelled dry, clean and smooth. They shall be free from paint, varnish, solvents, wax, oil, existing adhesive residue or other foreign matter.

Condition all flooring materials and adhesives to room temperature at least 48 hours prior to starting installation. Protect all materials from the direct flow of heat from heating fixtures and appliances.

**Note : It is highly recommended to have zero leveled sub-floor for installation of LVP.
Please use self-leveling compound to level the sub-floor.**

• Procedure

Installation shall be carried out according to Armstrong's recommendations(www.armstrong.co.in). The recommended adhesive should be used to ensure satisfactory installation.

• Adhesive

Armstrong recommends Arobond 44 of Arofine Polymers. Rubber based adhesives or any other solvent based adhesives are not to be used with CASITA.

MAINTENANCE

- Sweep or vacuum thoroughly
- Damp mop with a dilute neutral detergent solution
- Do not wash the floor for at least four to five days after installation. Black marks and dirty spots can be treated by spot scrubbing (use nothing more abrasive than a 3M blue or green pad or equal)
- Protect all materials from the direct flow of heat from heating fixtures and appliances

CASITA is designed to be maintained by traditional resilient flooring maintenance methods. The urethane protective finish can make initial maintenance easier, as well as reduce ongoing maintenance procedures.

WARRANTY

This product is not covered under Armstrong warranty.
